YORK COUNTY

MUTUAL FIRE INSURANCE COMPANY,

Office at South Berwick, Maine.

Incorporated by the Legislature of Maine, A. D., 1852.

A SAFE AND RESPONSIBLE INSURANCE COMPANY.

Amount of Property Insured, - - - - - -	$3,000,000,00
Amount of Premium Notes to meet Losses, - -	200,000,00

This Company continues to insure the most kinds of Real and Personal Property, on the Mutual principle, against loss and damage by fire and lightning. The Charter of said Company expressly provides:—"*That all property, whether real or Personal, shall be divided into four separate and distinct Classes; and each class shall be liable for its own losses.*" *Not each for the other, as in the old combination Companies.*

THE FIRST CLASS, OR FARMER'S COMPANY,

Insures Dwelling Houses, Barns and Out Buildings and their contents, when situated at a distance of *not less than four rods* from other buildings, for a term not more than six years. The farmers can readily see the advantages of insuring in a Class or Company by themselves, where they are not subjected to the risk of property more hazardous than their own. The assessment on five hundred dollars of property insured in this Class, for a period of 3½ years, is only one dollar and thirty-eight cents. Farmers will do well to insure in this Company, as it is much the cheapest Company in Maine.

THE SECOND CLASS, OR VILLAGE COMPANY,

Insures Dwelling Houses, Barns and Out Buildings, and their contents, in Towns and Villages, and in the Country, when situated at a distance of less than four rods from safe descriptions of Property: for a term not exceeding six years. This Class, while in its infancy, met with heavy losses, and assessed its members severely, as is most ever the case with all *new Companies*. It has now recovered from that shock, is firmly and permanently established, constantly receiving large accessions to its members, and has added a large amount to its capital. Its aim is onward, and will hereafter be a very cheap Campany.

THE THIRD CLASS, OR MERCHANT'S COMPANY,

Insures Stores, Merchandize, Public Houses, Churches, School Houses, Academies, Saddle, Harness and Trunk-makers' Shops, Bridges and other description of property not insurable in other Classes, for a term not exceeding three years. The assessment in this class for the past year has been less than stock rates by some 50 per cent.

This Company has done an active and highly successful business for the past four years. Its business is rapidly increasing, and is extending to every *town in Maine.*—It is emphatically a *State Company.* Combining all the advantages of town and local Companies, and free from their sectional and local disadvantages, in combining a sufficient capital to sustain a considerable loss. It is conducted with the most rigid economy, adjusts its losses liberally and promptly, and is confidently recommended to the favorable consideration of the Property holders of Maine. *It promises indemnity to the insured*, and ably and liberally sustains that assurance. For terms and information, apply at the Company's Office.

PREFACE.

In presenting the second volume of the MAINE REGISTER AND BUSINESS DIRECTORY to the public, we might content ourselves with simply making our acknowledgments to our patrons and the public; but the character of the present number, prepared under our enlarged experience and observation, justifies a few words of introduction.

We have endeavored to make the second number more attractive and valuable than its predecessor; and the present enlarged and well-filled volume demonstrates our success.

The Register contains the most desirable business information that could be furnished in the same space and form,—valuable alike to Merchants and Manufacturers in every branch of industry throughout the State. Also, a complete record of State and County Officers, for the current year.

Our thanks are due to all who have so kindly aided and sustained us by their coöperation and patronage.

It will contain, in addition to the BUSINESS DIRECTORY, a variety of matter relative to the

MECHANICAL AND MANUFACTURING INTERESTS OF NEW ENGLAND.

ALSO, A VARIETY OF USEFUL INFORMATION.

Every Trade, Occupation, and Profession, will be fully represented; and those who wish to give a more detailed account of their business than can be given in the special directory, will have an opportunity of doing so in the Miscellaneous and Advertising Department of the work.

The attention of Business Men is respectfully invited to the work, and with their co-operation the publisher hopes to make it a faithful representation of the

ENTERPRISE AND BUSINESS OF NEW ENGLAND.

The following vote in regard to the work was passed by the **Boston Board of Trade,** *Dec.* 17, 1855.

"*Resolved*, That the Board of Trade look with favor upon the announcement of a New England Business Directory which Mr. George Adams has the intention to publish, and consider that it will be a valuable work of reference to the business community."

The work will be of Octavo size ----- handsomely printed, and contain from six to eight hundred pages.

PRICE,.....$3.00.

Advertisements will be inserted in the Advertising Department at the following rates, including a copy of the work:

By an Act of the Legislature of 1852 an important change was made in the Judiciary of this State. The District Courts, which took the place of old Courts of Common Pleas, were abolished; and all their jurisdiction transferred to the Supreme Judicial Court, to which bench three additional judges were authorized by the above Act. The State is now divided into three Judicial Districts, denominated the Western, Middle, and Eastern Districts; and for the purpose of hearing and determining questions of law and equity, the terms are held for these districts, instead of being held, as heretofore, in the several counties. These terms are held annually in Portland for the Western, in Augusta for the Middle, and in Bangor for the Eastern District. The other cases are tried, as hetetofore, in the several counties where they are commenced.

MAINE.

HER RESOURCES AND PROSPECTS.

The most eastern star in our Confederacy is about as large as all New England beside; has more than 200 miles of sea coast, and was the last of the Eastern States to be admitted into the Union. There were unsuccessful attempts to settle Maine before there was a permanent settlement in Massachusetts. For a long period it was an unimportant settlement, and even when the first national census was taken, in 1790, its population was but 96,540, or less than four times the population of its chief city at the present time. It had a population in 1850 of 583,169, or more than any other State in New England, save Massachusetts, from which it became separated in 1820. At this date, it had but a third of the 700,000 inhabitants in the State at the time of the separation, but it has been gaining upon Massachusetts since, for at the time of the last census it contained considerably more than twice as many inhabitants. And when we consider that Maine has nearly five times as many square miles as this State, more large and navigable rivers and water power than all the rest of New England,—about as much sea coast,—boundless forests,—abundance of granite and ice,—greater proximity to Europe and the British Possessions in North America,—less soil incapable of cultivation in proportion to its extent than any Atlantic State,—it is difficult to see how it can help making more rapid strides in the future, so that Massachusetts must look out for her laurels. Was the prediction of Mr. President Van Buren very wild, then, who thought a few years ago, after travelling through Maine, that it might in time become the first commercial State in the country?

When we think of Maine, we remember particularly its forests,—(it is called sometimes the Pine Tree State),—its vast lumber business,—its ship building, and its growing commerce. A few statistics will show the relative commercial standing of the State. In new vessels she ranks first in the Union; in the fisheries, second; in the general aggregate of tonnage, the third; in imports, the eighth; in exports, the eleventh. In the number of vessels annually built she took the lead in 1820, and has maintained her supremacy ever since. For that year the tonnage of her new vessels was 27,705; while in 1851 the tonnage was 168,631 tons against that of New York, the next largest, of 72,073 tons, and Massachusetts, the third, numbering 48,000 tons. Her 110,047 tons of shipping, built in 1852, were valued at $4,400,000.

In 1790 the whole tonnage of the United States, says the Hon. William Willis, was but 473,377 tons, less by 100,000 than the present tonnage of Maine. Thus it will be seen, the State is now essentially commercial, and any one who examines a map of the State, and remembers its numerous fine harbors, and that a sixth part of its surface is covered with water full of salmon, trout, and other fish, will regard it prospectively as a vast commercial State.

The lumber interest of Maine is an immense one. A paper on life in the woods in the northern part of the State in the winter, would be exceedingly interesting, if properly prepared. Thousands of lumbermen spend their winters cutting and hauling timber that is taken down the great rivers of the State to the various markets. For a single recent year the lumber surveyed

at Bangor, one of the greatest depots for the article in this country or any other, amounted to 65,396,352 feet. The preceding year it was 14,000,000 feet more. It consisted of green pine, dry pine, spruce, hemlock, hard wood, bass, etc.

In agriculture Maine is no mean State. Though the attention of the people has been diverted from it by the more lucrative lumber trade, yet it has not been entirely neglected, as the following figures will show. In the State there were, by the last census, 46,760 farms, while the whole number of dwellings was 95,797; that is, about half of the dwellings, we may suppose, were farm houses. These farms employed in their cultivation 77,000 people in the fifteen counties of the State, from old York to young Aroostook. The entire lands of the State are valued at $55,000,000, and the farming implements at over $2,250,000. In live stock Maine is the 19th State, valued at $9,700,000; in wheat the 20th, producing 350,000 bushels; in Indian corn the 28th, 1,750,000 bushels; in oats the 19th, 2,181,000 bushels; in wool the 12th, 1,364,000 pounds; in potatoes the 7th, 4,436,000 bushels; in butter the 10th, 9,243,811 pounds; in cheese the 8th, 2,434,454 pounds; in hay the 5th, 755,839 tons. Thus it will be seen, our eastern neighbors excel in their hay and potato crops, and in the produce of the dairy. The value of these articles mentioned above, and such as these, is thirty millions of dollars annually.

The principal agricultural products of Maine may be put down as hay, Indian corn, wheat, barley, rye, flax. Other products of the soil are pine and other timber, lime and marble.

The manufacturing interest of Maine is rapidly increasing, and there is a field, a grand field for its being carried on to almost any extent. Already many boots and shoes are made in the State; woollen goods are moderately produced, while the amount invested in cotton manufactures is $3,329,700, against $28,455,630 in Massachusetts. The entire capital invested in the manufacturing interest in Maine is placed at $14,700,452; and the annual product of manufactured articles is rated at $24,644,430.

Maine has some 500 miles of railroad completed, and more miles in prospect, and in the eloquent words of Bishop Burgess, "A mysterious wire has taken up the intelligence which has been laboriously transmitted from the shores of Europe, across the ocean, and in an instant has conveyed it from Calais to the press of New York."

The future of this Star in the East, we may reasonably hope, will be particularly bright. Though it is a cold region, too cold for some agricultural crops, the very cold aids the ice harvest, and braces the people for the most active exertion. Altogether Maine must be a first-rate State in our glorious Union.

VOTES FOR GOVERNOR IN 1854 & 1855.

In the tables following will be found the number of votes given in each town for the principal candidates for Governor in 1854 and 1855, as published in the Augusta Age.

The counties, and towns in each county, are arranged alphabetically. With but few exceptions, we give the name of the Town Clerk for 1855, in each town.

Terms of Admission.

The requisites for admission to the Freshman Class are testimonials of a good moral character, a thorough acquaintance with English, Latin, and Greek Grammar, Cæsar's Commentaries or Sallust, Virgil, Cicero's Select Orations, Latin Prosody, the making of Latin, the Gospels of the Greek Testament, Jacob's Greek Reader, Ancient and Modern Geography, Vulgar and Decimal Fractions, Proportions, the doctrine of Roots and Powers, and Algebra, so far as to be able to solve equations of the second degree. It is recommended to students in preparation to read attentively some convenient manual of Greek and Roman History. Kuhner's Elementary Greek and Latin Grammars, including the Exercises, or Champlin's Greek Grammar, and the Latin Grammar of Andrews and Stoddard are required.

Candidates for advanced standing are examined in the preparatory studies, and in the various branches to which the class they propose to enter have attended. Those who are admitted from other colleges, must present certificates of regular dismission. In all cases testimonials of good moral character are required.

The stated times for examination are Monday and Tuesday before Commencement, and the first and second days of the first term.

Partial Course.

Individuals of suitable age and acquisitions, wishing to fit themselves for Mercantile, Agricultural, or any of the other active pursuits of life, will have every facility for pursuing a partial course of study, of not less than one year —they selecting such studies as they may desire. They will be required to recite with the regular college classes at least twice a day, will have free access to the Libraries and Lectures, and on leaving the institution will be entitled to a regular certificate of their respective attainments.

Lectures.

In connection with the regular recitations, Lectures are delivered to the several classes on the following subjects: — Chemistry, Geology, Mineralogy, Botany, Conchology, the various branches of Natural Philosophy, Intellectual Philosophy, Evidences of Christianity, Greek History and Literature, Roman History and Literature, Greek and Roman Mythology, Verbal Criticism and History of the English Language, Modern History, Means of Preserving Health.

THEOLOGICAL SEMINARY.—Bangor.

The Theological Seminary at Bangor received its charter from the Legislature of Massachusetts, in the year 1814. It went into operation at Hampden in the autumn of 1816. In 1819 the Institution was removed from Hampden to Bangor, where it is now permanently established. Its first Professors were Rev. Abijah Wines, formerly of Newport, N. H., and Mr. Jehudi Ashmun, afterwards the founder and first Governor of the Colony at Liberia.

The Seminary was originally founded on the plan of the English Dissenting Institutions, combining a classical and theological course of study, which occupied the term of four years. After a few years this plan was dropped. The Classical department was separated from the Theological; the terms of admission to the Seminary proper were raised; the course of study, and the period of it, were made similar to those at Andover and Princeton.

For many years the Seminary was constantly embarrassed for the want of funds, but is now relieved, in good measure, from such embarrassments. It has three Professors, and is expected soon to add a fourth. The existing Professorships are fully endowed; the buildings are in a good condition; and it has a Library of 10,000 volumes. The number of students for the last twenty years has been very uniform, rarely rising above fifty or falling below forty.

This Seminary, though under the particular charge of Orthodox Congregationalists, is equally open to Christians of other denominations, and students of other denominations are always found within its walls.

No student is charged for instruction, room-rent, or use of library. Almost the only expense to the student is that of board, and he is aided very considerably in the payment of this; so that board (including washing) does not average more than a dollar a week.

The course of study at this Seminary embraces Sacred Literature, Systematic and Pastoral Theology, Church Polity, Sacred Rhetoric and Ecclesiastical History; and is intended to be as full and as thorough as at any Seminary in the United States.

MAINE STATE SEMINARY.—Lewiston.

Incorporated 1855.

Rev. Ebenezer Knowlton, *President.* Rev. Oren B. Cheney, *Secretary and General Agent.* Francis Lyford, Esq., *Treasurer.* Samuel Swanton, Esq., and Rev. Nahum Brooks, *Auditors.*

METHODIST EPISCOPAL CHURCH.—Maine.

The M. E. Church in this State is divided into two Conferences—Maine and East Maine. Maine embraces that portion of the State West, and East Maine that East of the Kennebec River.

Each Conference is divided into three *Presiding Elders' Districts.* Each District embraces several Stations and Circuits, amounting, in all, to 177. Connected with these Conferences, there are 195 Travelling and Superannuated, and 157 Local Preachers.

The Church membership in the State amounts to 20,270.

These Conferences have each a Seminary of learning of a high order, both in a flourishing condition and very liberally patronized.

THE MAINE WESLEYAN SEMINARY,

Located at Kent's Hill, under the management of the Maine Conference, has long held an honorable position among the institutions of learning in New England. Men, eminent for their talents, educated at this Seminary, are now filling important stations of responsibility and usefulness in nearly every State in the Union.

HAMPDEN ACADEMY.—Hampden.

Thomas Tash, A. M., *Principal.* Miss Frances E. Lord, *Preceptress.* Mrs. J. R. Tash, *Teacher of Drawing and Painting.* Mrs. A. Josephine Warren, *Teacher of Music.*

The Academy is very pleasantly situated between the villages of Upper and Lower Hampden, on an elevated and healthful situation, sufficiently retired from the business parts of the villages to make it a very desirable place for study. The school-rooms have recently been enlarged, thoroughly repaired, and refitted in the most approved manner.

The villages of Hampden offer to students resorting here, the various advantages of good society, several meetings of public worship, good boarding places, and very easy access from almost every quarter. Boarding places can generally be secured for those at a distance, and further particulars had on addressing the Principal. Rooms can be obtained by those wishing to board themselves, and in this way the cost of board may be much reduced.

Commenced May, 1848. Chartered, July, 1849.

E. P. Hinds, A. M., *Principal.*

This School is located in South Paris, Me., the principal village of Paris, the shire town of Oxford. It is about five minutes' walk from a station on the Grand Trunk Railway, and is easily accessible from all parts of New England.

The Institute has so far received a large share of public patronage, and still continues to meet with good success, while its advantages are believed to be as extensive as those of any Academy in the State. Its design has special reference to preparing young gentlemen and young ladies for teaching either public or private schools. Students are also fitted for College. Music, Drawing, &c., are taught.

The instruction in the Language Department is continued through a course of three years. The Department of Mathematics and Natural Science offers superior advantages. For this, valuable philosophical and chemical apparatus will soon be obtained. The Board of Instruction consists of six teachers.

There are four sessions a year, commencing the last Wednesdays in February, May, August, and November. Tuition from $3.00 to $5.00 according to studies. Board in families at the lowest rates. SCHOOLS IN MAINE.

The present prosperous condition of the Schools of Maine afford ample ground of encouragement to her citizens, and to all who take an interest in the cause of general education. Each year's development of the system and management pursued exhibits a marked and gradual improvement.

From the last Annual Report of the Superintendent of Common Schools we learn that the whole number of scholars returned is 238,248; the number of teachers employed was 6,696; of these 2,559 were males, and 4,137 were females.

The whole amount of money raised was $333,019.76, while that required by law was $281,148.00, showing an excess of $51,871.76. This, of itself, is a gratifying indication. The amount received from the State the past year was $54,398.96; from local funds, $16,990.57; and that expended for private schools, $23,843.00; forming an aggregate of $428,252.29 as the sum defrayed for school purposes. The amount raised by law gives to each scholar, on the average, $1.36; that received from the State, 30 cents; and from local funds, with the sum expended in the support of private schools, 12 cents; forming an average sum to each scholar in the State, of $1.78.

There has been expended the past year, in the erection of new school-houses, the sum of $62,808.00; the estimated cost of all the school-houses in the State is $870,005.00. This fact exhibits how important an object of interest our Public Schools are. The sources of income to the Public Schools are the Bank Tax and the interest on the Permanent School Fund.

There can be no greater object of interest to the patriot and philanthropist than the training of youthful minds. For as sure as the harvest, by the blessing of God, depends upon the care and attention bestowed in the sowing, so does the well-being of society and our stability as a nation hang upon the mental and moral culture which our youth have received.

Our Public School System is one in which every citizen of the State has an equal interest, for each is alike affected by its growth and improvement.

In our sphere and according to our ability, if we would come at once to the standard, our motto should be the noble sentiment of the Prussian Dintner, who, with what result is now known world-wide, infused his spirit into the hearts of his countrymen. "I promised God that I would look upon every Prussian child as a being who would complain of me before *Him*, if I did not use my utmost endeavors to provide for him the best education, as a man and a Christian, which it was possible for me to provide." Such being the motto we would adopt, the time is not far distant when our Public School System will be in a condition unequalled by any in the Union.

Banks, Josiah Pierce, Jr., James Merrill, *Associate Managers.*

This deservedly popular Society was organized in 1843, with a respectable Cabinet, which had been increased by continued additions of valuable articles till it contained more than six hundred mounted birds; upwards of four thousand different species of shells, and ten or twelve thousand specimens; more than two thousand varieties of minerals; a large number of rare fossils; several cases of reptilia, crustacea, skeletons, and preparations of animals; more than one hundred species of fishes, and numerous other specimens of interest which could not be conveniently arranged in cases. On the 8th of January, 1854, this whole Cabinet, together with the Society's choice collection of books, was consumed by fire. As there was no insurance, the loss of the Society was at least twenty-five thousand dollars. We are, however, happy to learn that, through the liberality of the citizens of Portland, and other friends of science abroad, a new Cabinet has been formed, valuable in itself, and a nucleus around which, we trust, will speedily gather another still more valuable than that which was destroyed, and which will do credit to the Forest City and State.

Incorporated July 22d, 1847. Went into operation, 1850.

From Mechanic Falls, *via* West Minot, East Hebron, Buckfield, Sumner, Hartford, to Canton Point; distance, 28 1-2 miles.

Francis O. J. Smith, *Proprietor.*

On the extension of the Buckfield Branch Railroad, one station, in Sumner, five miles from Buckfield, has been opened during the past year. But all to Canton Point will be opened by mid-summer, at which point the proprietor has obtained a charter for the re-construction of the bridge across Androscoggin River, for public travel, and a large Hotel is also being constructed there for public accommodation.

The steamer has been employed, through the ice-bound season of the river, in driving a mill of two saws, and various other machinery. There has been constructed a stone dock, extending about 100 feet into the bank of the river, by thirty feet wide, upon one side of which the extensive mill is constructed; and the arrangement is such that, during the summer season, the boat comes down river, — enters the dock, — delivers her passengers and cargo, — is immediately belted from the shaft of her paddle-wheels to the mill shafting, — the paddles being released from confinement to the shaft, and ceasing to turn with the shaft; and thus, while the cars make their upward and downward trips, through the day, the boat remains hard at work driving the mill. On the arrival of the last train at night, the boat is released from her belting with the mill, — the paddles resume their fixed condition on the shaft, — passengers and freight being all aboard, she "walks the water like a thing of life," up river, to repeat her good services again on the following day.

Thus, in summer and in winter, the boat is made no less useful to the industry of the road, and to the convenience and profit of the owner. If this be not a new thing under the sun, history is at fault.

Canton Point, on the roadside of the river, is one of the most beautiful spots in all New England. The scenic view from the elevated ground near the terminus of the Branch Road, is beautifully and unsurpassingly sublime. More than 2,500 acres of magnificently rich interval is seen on the opposite side,—miles of the winding Androscoggin are seen in broken perspective, amid the towering hills of Oxford, until the high peaks of the White Mountain, in the outer distance, close in the horizon, encompass the view, forming a panorama of natural beauty which the worshipful artist might study, without exhausting, almost for a life-time.

STATE REFORM SCHOOL.

ESTABLISHED IN 1853, AT CAPE ELIZABETH, CUMBERLAND COUNTY.

W. R. Lincoln, *Superintendent.*
J. T. McCobb, *Treasurer.*

Henry Carter, Oliver L. Currier, James T. McCobb, Joseph H. Williams, William A. Rust, *Trustees.*

The number received from December 1, 1854, to November 30, 1855, inclusive, was as follows:—Boys in the School December 1, 1854, 113; committed since, 148; whole number in the School during the year, 261; discharged, 27; remaining, November 30, 1855, 234.

The whole number committed since the opening of the school is two hundred and sixty-five; thirty-one of whom have been discharged; leaving two hundred and thirty-four still under our care.

It is with pleasure we are able to report the present prosperous condition of the Institution. Nothing has occurred during the year just closed particularly discouraging. Much improvement is seen in most of the boys, and a great majority of them manifest a gratifying desire to aid in the duties of the Institution, and a lively interest in its prosperity and usefulness.

The building is capable of accommodating two hundred and forty boys. There are now, therefore, nearly as many as can be well provided for, with the present conveniences.

The result of the farming operations the past year, at the current prices, amounted to $3,813. The whole number of articles made in the clothing department was 4,423.

Besides the mechanical instruction of various kinds which they receive, and the knowledge which they obtain of the different trades and employments of life, a due regard is paid to their religious instruction by preaching every morning in the Chapel (which is now finished and furnished since the rendering of the last annual report) and the establishment of a Sabbath School, which is conducted by twenty-two ladies and gentlemen from the various churches in Portland, from which it will be seen by the last report that much good has resulted.

There is a Library containing some useful works well adapted to the peculiar class of readers which read them. The publishers of several of the papers also furnish their journals to the Institution.

In a word, the Institution is one which the State of Maine may well feel interested and take pride in — supervising as she does her juvenile offenders by taking them under her own immediate care, and by a system of judicious management and correction, fitting them to commence their lives anew upon fixed principles of right, with the prospect before them of reaping that reward which honest industry and perseverance merit.

THE GREAT FAMILY REMEDY!!

G. W. STONE'S

VEGETABLE LIQUID CATHARTIC!

The public do not require to be told that a mild, safe and reliable cathartic in a liquid form, agreeable to the taste and one which purges without violence, is a *desideratum* in medicine; this fact will be admitted by all. Such a discovery has been often attempted, but without success, until the introduction of the above named remedy.

No patent medicine ever met with such ready approval by physicians as this. Many regular practitioners are using it daily, all of whom have spoken of it in the highest terms of praise. Persons for the want of a better have been obliged to resort to the use of those drastic, nauseous, and oftentimes injurious purgatives. such as castor oil, salts, senna, jallop, rhubarb, alloes, gamboge, &c., all of which cause more or less depletion, and fail to accomplish the object for which they are taken; on the contrary, they often increase the difficulty and render the patient less curable. None of these enter into the composition of this invaluable remedy. It is composed of barks, roots and seeds, the medical properties of which are exactly adapted to the cure of those complaints for which it is recommended. By a combination of those properties the public were put in possession of the most valuable preparation ever produced. This medicine is not intended simply as a cathartic; its value as such is insignificant when compared with its power of purifying the blood from all humors, regulating the action of the bowels, curing Dyspepsia, restoring the appetite, producing a healthy action of the Liver, freeing the Stomach from bile, and invigorating and strengthening the whole system. It is a certain cure for the Piles, and those suffering from that complaint should give it a trial. It is also warranted to cure Canker in its worst forms. For all diseases of the bowels it cannot be recommended too highly. In Summer Complaints, such as Dysentery, Diarrhœa, Cholera Morbus, &c., it will be found invaluable.

Reader, as sure as the sun rises in the east, just so sure you will be benefited by the use of this medicine for any of the above complaints, and as sure will it relieve those suffering from Rheumatism, Neuralgia, Tic Douloureux, Gout, Headache, and Pain in the Side and Stomach, caused by Flatulency, Loss of Appetite, Indigestion, General Debility, &c., are often caused by wind in the Stomach, which this remedy will expel at once. It is an excellent remedy for Sea Sickness. Those having occasion to travel by water should be provided with this remedy.

G. W. STONE'S

Cough, Consumption and Bronchitis

ELIXIR.

The Proprietor would respectfully call the attention of the public to this invaluable Remedy for all affections of the Throat and Lungs, and begs of those who are undecided what to select from the numerous medicines advertised, and recommended for such complaints, to give his ELIXIR a trial. Having done so they will no longer hesitate what to take themselves, or recommend to others. A single trial will prove to them that this is the most valuable remedy ever discovered for the various affections of the Throat and Lungs; it will immediately relieve the most violent Cough, and in a few hours completely cure the most severe Cold.

As a Preventive and Cure for Consumption, it has no equal. It is purely Vegetable, contains no poisonous ingredients, is quite agreeable to the taste, and may be given with perfect safety to the most delicate child. The numerous testimonials received almost daily from those who have been cured by it, justify the assertion, that no family should be without this Medicine. Let mothers give it to their children who have the Whooping Cough or Croup, and they will alleviate at once the sufferings of their little ones.

WONDERFUL AND ASTONISHING!

THE BEST VEGETABLE PURGATIVE PILLS IN THE WORLD.

TEN FOR TEN CTS. PER BOX, **CTS.**

Each Box containing 25 Pills.

G. W. STONE, of Lowell, Mass., having discovered that a root found upon the mountains of New England, contains medicinal properties of the utmost value, has prepared a compound in the form of Pills, which he offers to the public as an invaluable remedy in a variety of complaints; and as he intends these Pills shall be sold by all Grocers as well as Druggists, has given them the title of

THE GROCER'S VEGETABLE PURGATIVE PILLS.

They are intended for all the purposes of a Family Physic, and that their virtues may become universally known, he has fixed the price at the ASTONISHING LOW SUM OF

ONE DIME PER BOX!

The public will understand how the best Pills in the world can be sold at that price, when they learn that no costly newspaper advertising and puffing is required to create a demand for them. They stand upon their own merits, and are sold by dealers who are content with a small profit, which places them within the means of all. THE GROCER'S PILLS will be acknowledged by all who use them, to be the best remedy ever discovered for all ordinary complaints, such as *Costiveness, Foul and Bilious Stomach, Affections of the Kidneys, or Liver, Flatulency, Morbid Inaction of the Bowels, Dysentery, Diarrhœa, Headache, Nausea*, and all complaints arising from a low state of the system.

DOSE.—From three to five, night or morning.

PRICE, TEN CENTS PER BOX.

E. SARGENT HANSON,

Inventor and Manufacturer of the celebrated

United States Commercial Writing Ink,

AND OF THE UNRIVALLED

UNITED STATES INDELIBLE INK,

FOR MARKING ON ALL KINDS OF FABRICS.

The Writing Ink is a chemical preparation, and has now stood the test of our variable climate, and maintains the promise of its inventor, both in summer and winter, of resistance to atmospheric changes, fast color, will not mould, flows beautifully, and does not corrode Steel Pens. It has nothing of the muddiness about it, which is common to much of the Ink on sale, but has a free and limpid flow, and increases in blackness after being committed to paper, and the color is durable.

For Schools and for general use, therefore, as well as for Counting Houses and Banks, it should be had in general requisition. As a Copying Ink, it is not surpassed by any manufactured or imported into this country.

The Indelible is also very cheap, no preparation of cloth is required, except it be smooth and dry. For all kinds of fabrics write with any kind of pen. It stands the tests of acids and of lye.

For Sale by the Inventor, at South Berwick, and by Stationers and Booksellers generally throughout the New England States and California.

South Berwick, Maine, January 1, 1856.

U. S. AND FOREIGN

PATENT AGENCY,

39 STATE STREET, BOSTON.

SAMUEL COOPER,

LATE CHIEF EXAMINER IN THE U. S. PATENT OFFICE,

PROCURES PATENTS IN THIS AND FOREIGN COUNTRIES.

His long official connection with the Patent Office has rendered him familiar with its rules and practice, and with the history of invention in this and other countries; and this experience, with the frequent visits which he proposes making to the Patent Office, justifies him in saying that his Agency will offer to Inventors all the advantages of one located in Washington, and, in addition, those which result from a residence in the midst of mechanical and manufacturing industry.

Advice given upon all matters relating to the validity, &c., of patents, the novelty and patentability of inventions. Specifications and Drawings prepared, — Caveats filed, — Re-considerations procured of applications that have been rejected upon imperfectly prepared papers, — Cases of interference, and applications for extension and re-issue prosecuted, — and in general, all business connected with the Patent Office, transacted with care and promptness.

British and other foreign patents procured, through prompt and confidential agents in London and Paris.

Persons residing at a distance may obtain all necessary information, and have their business transacted by writing to the subscriber, without the trouble and expense of a visit to Washington.

He begs leave to refer those unacquainted with him to the following testimonials:—

FROM THE HON. CHARLES MASON, COMMISSIONER OF PATENTS.

U. S. Patent Office, Feb. 28, 1855.

I take great pleasure in stating that during the time I have been acting as Commissioner of Patents, Samuel Cooper, Esq., of Boston, has been engaged as solicitor, and has been in that capacity in constant correspondence and intercourse with the Office; he has evinced a thorough acquaintance with the Patent Law, and with the rules and practice of the Office, a close attention to the interests of his clients, and a marked candor and courtesy that has rendered the transaction of business with him a pleasure. I have no hesitation in stating that I regard him as one of the very best agents for the transaction of business with this Office with whom I am acquainted.

CHARLES MASON, *Commissioner.*

FROM THE EXAMINERS IN THE PATENT OFFICE.

"The undersigned, Principal and Assistant Examiners in the United States Patent Office, have for several years been well acquainted with Mr. Samuel Cooper, lately a principal Examiner in this Office, and take pleasure in stating that he is a gentleman of the highest moral character, of unquestioned knowledge in the business and practice of the Office, and that his scientific attainments are such as eminently fit him for the business in which he is about to engage.

Henry B. Renwick, L. D. Gale, J. H. Lane, } *Principal Examiners.*

T. R. Peale, Thos. T. Everett, F. Southgate Smith, Wm. Chauncy Langdon, } *Assistant Examiners.*

"From long acquaintance, and intimate official relations with Mr. Cooper, I fully and heartily concur in the foregoing recommendation made by my late colleagues.

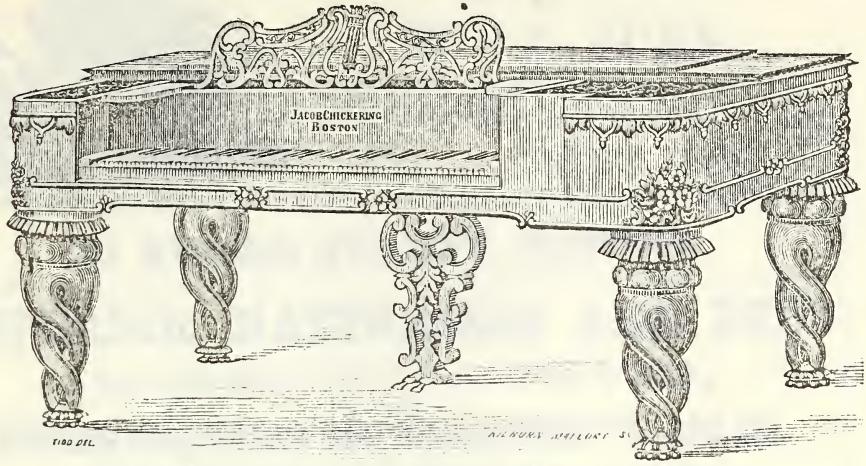
An extensive assortment always on hand at very low prices.

JACOB CHICKERING,



300 Washington Street, Boston, Mass.,

Has recently invented machines by which he is able to make in the **MOST PERFECT MANNER**, and with far greater rapidity than they have been heretofore.

He is making a new style Piano-Forte Leg, in the form of a SPIRAL SCROLL, which is much admired by all who have seen it, for its superior style and beauty.

He can now supply orders, Wholesale or Retail, and will guarantee his Instruments to be of the **FIRST CLASS**, and to give satisfaction, or he will refund the money. Persons wishing Piano-Fortes, and enclosing their orders by mail, can have them forwarded, with full directions how to set them up.

OPINIONS OF MUSICIANS AND THE PRESS.

Prof. H. S. May, the English Pianist:

"I have taken an opportunity and examined the Piano-Fortes manufactured by JACOB CHICKERING, and find them made in the most thorough manner and with great elegance of exterior finish. They also possess a lightness of action and fullness, power and brilliancy of tone, which are always requisite to constitute a First Class Piano-Forte. I take pleasure in recommending them as superior Instruments."

Prof. T. H. Howe:

"Having examined the various kinds of Piano-Fortes manufactured by JACOB CHICKERING, of Boston, Mass., and having used them myself, I cheerfully recommend them to persons wishing First Class Instruments.

"THOS. H. HOWE,
"Teacher of Music, 85 Bedford Street."

J. M. Mozart, the popular Basso of Boston:

"Having often seen and tried JACOB CHICKERING'S Piano-Fortes, I can freely say that they give the Ear perfect satisfaction, and in finish, are unsurpassed by any Instruments that I have examined —their action is perfect; being free from that stiffness which characterizes most of the Pianos now in use.

"J. M. MOZART."

Mr. CHICKERING was also awarded a beautiful DIPLOMA by the New England Inventors and Mechanics' Mutual Association, for best Pianos, at its Exhibition in 1855.

The Jury on Musical Instruments, Class No. 14, consisted of J. M. Mozart, Edwin Fobes, and Sumner Hill.

The following are some of the Notices of the Boston Journals of that date :—

From the Evening Telegraph.

"JACOB CHICKERING, of this city, has on exhibition two seven-octave Piano-Fortes of excellent tone and finish, which attract much attention from the numerous visitors to the exhibition, The cases are most elaborately carved and ornamented, with spiral scroll legs of a new and beautiful design."

From the Boston Herald.

"JACOB CHICKERING has on exhibition two Instruments, the first that he has ever exhibited in public, and their superior tone, action and workmanship throughout are admired by all who see them. We noticed that the last or highest octave in these Instruments is unusually full and brilliant, and that the action of the keys is very quick and elastic. One of the Instruments has the most beautiful case we ever saw. It has the newly designed double scroll legs, and the entire case, which is made of rosewood, is carved in the richest manner. The two Instruments we have mentioned are worthy of a careful examination.

SUCCESSORS TO THE

LOWELL WIRE FENCE COMPANY,

MANUFACTURERS OF

PATENT

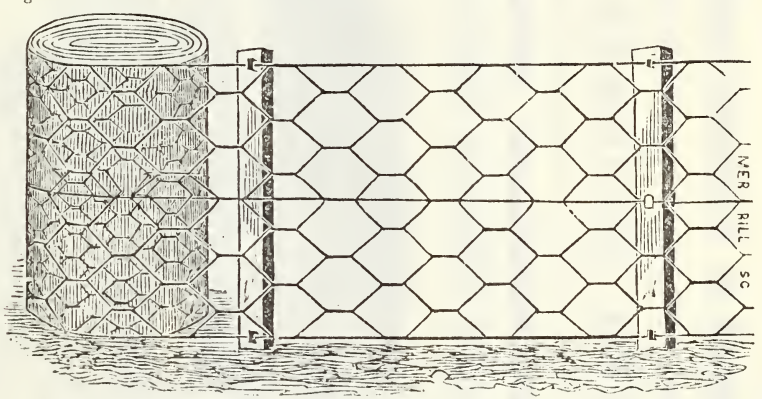
WINDOW NETTING & WIRE FENCING,

WOVEN BY MACHINERY.

Which, for cheapness and utility, is superi or to any article heretofore used, for enclosing Railroads, Canals, Cattle Fields, Gardens, Cemeteries, Heneries, and for Ornamental Garden Work, Grape and Rose Trellises, &c., &c.

No. 38 Water Street, Boston, Mass.

The purpose of this advertisement is to call attention to our WIRE FENCING, represented in part by the within diagram, which, for economy, strength, closeness, portability, elegance and durability, may challenge competition with any Fencing in the world.



Above is a diagram of our fence, with a roll from which it has been unrolled. The posts are of wood, set from eight to twelve feet apart, but they *may* be of iron or stone, or trees may be used where they are convenient. *Rails are entirely dispensed with.* The fence is raised from four to twelve inches from the ground, and is drawn straight and tight, and kept upon an exact level, (or regular inclination), from end to end. Care is required to put it up substantially and neatly. Staples secure the fence to the post, each lateral (or horizontal) wire being clasped with a staple at every post; but bolts or screws, with hooked heads, or wire twisted round the posts, answer the same purpose. There are several descriptions of this fencing.

No. 1 is 3½ feet high, with meshes, (or open spaces), 3 inches square; 4 lateral wires, (as in the cut above), of No. 10 wire, run through the body of the fence, which is of No. 14 (or No. 15 (wire. The weight is ten lbs., and the price is $2,00 per lineal rod, (16½ feet.)

No. 2 is precisely like the first kind, except that there are but two lateral (or straight) wires in it—one at the top, and another at the bottom of the fence. This is 9 lbs., and $1,75 per rod.

No. 3 is 2½ feet high, with meshes 3 inches square; it has 3 lateral No. 10 wires, with the body work of No. 14 wire. It is 7½ lbs., and $1,50 per rod.

No. 4 is precisely like the third kind, save that the lateral wire in the middle is omitted. It is 6¾ lbs., and $1,37½ per rod.

These kinds are the best for Cemeteries, Gardens, Door Yards, Heneries, etc.

No. 5 is 16 inches high, with meshes 3 inches square; there are two lateral (outside) wires of No. 12 wire; the body is No. 15. It is 4½ lbs., and 75 cents per rod. It is used for ornamental garden work.

No. 6 is 3½ feet high, with meshes 6 inches square; it has four lateral No. 10 wires, and the body work of No. 12 wire. It is 10 lbs., and $1,25 per rod. This kind makes the best and most practicable barrier against cattle, around fields, along canals, railroads, etc. Some of the Railroad Companies have already adopted it. Indeed it is emphatically a RAILROAD FENCE.

No. 6 extra is of the same dimensions as No. 6, the wires being one number heavier throughout. It is 3¼ feet high; the lateral wires are of No. 8, and the body of No. 11 wire. It weighs 12 lbs., and is $1,50 per rod.

No. 7 is precisely like the sixth kind, except that the two middle latteral wires are omitted. It is 8¼ lbs., and $1,00 per rod. It is the cheapest SHEEP FENCE that can be erected, and (like the second kind) it is admirably adapted for trellis work, for grape vines and roses, for gardens, etc.

No. 8 is of the same size wires as Nos. 6 and 7. It has three lateral wires running through the fence, and is $1,12 per rod.

The prices above given are those at which we deliver the fence in rolls at any of the depots in Boston, for *cash in all cases.* A liberal discount will be made to wholesale dealers. A roll contains about twenty-five rods, but we will manufacture to order any quantity, more or less, as may be ordered.

Our fencing is varnished black with asphaltum varnish, before leaving the mill; the varnish gives it a beautiful appearance, and protects it from the influence of the weather—from rust. If protected from oxydizing by this varnish, (or by paint, or tar, or japanning, or galvanizing)) the fence WILL NEVER WEAR OUT; but the varnish will require renewing once in every four or five years.

This fencing is impassable to all stock; it does not "hold" the wind, and can never be blown down in a gale; no flood will wash it away, since it offers no resistance to the current; it excludes none of the solar rays, so conducive to vegetation; it does not confine the heat, (like board fences or walls), which is prejudicial to crops; it does not occupy and exhaust the soil, like hedges; it requires no repair, save an occasional replenishing of the varnish; and wherever it has been tried, it has given the most unqualified satisfaction. This last fact is attested by many hundred letters now in the hands of the Treasurer of the Company, written by scientific and practical farmers in all parts of the Union.

Our WINDOW NETTING is of various widths, from 13 to 28 inches; it is of 15, 16 or 17 wire, and varnished like the fence, and sold at *seven to ten cents* per square foot, being less than one half the former prices.

FLAT ROOFS.

THE

NEW ENGLAND ROOFING CO.

Having largely increased their facilities for Manufacturing, are now prepared to answer any orders for

WARRENS' IMPROVED

FIRE & WATER-PROOF

ROOFING MATERIAL,

It has been used upon Dwelling Houses of the first class, Warehouses, Railroad Depots, Freight and Car Houses, Manufactories, and Bridges, and has been pronounced by Architects, Builders and others, who have a knowledge of its merits, to be of great durability, and to be possessed of fire and water resisting properties, to an extent beyond that of any Roofing Material now in use.

TESTIMONIALS.

New England Co.—Gentlemen—The block of buildings recently erected by me in this city, on the avenue leading to the People's Ferry, were covered with your Roofing. During the progress of the great fire, which originated on Battery Wharf, (and which destroyed so much valuable property in that vicinity), they were exposed for a long time to a most intense heat, with no apparent effect; the building finally took fire in the lower stories.

The *interior* of the building was completely burnt out before the *roof* fell. It is my opinion that the fire never passed through the roof, but that it fell finally for want of support.

I was on the roof many times during the progress of the conflagration, and can say from personal knowledge, that its resistance to fire is greater than that of any roofing material that I have ever seen.

Boston, May 1st, 1855. FRANCIS C. DOANE.

To whom it may concern—I hereby testify that I have used Warrens' Fire and Water-Proof Composition Roofing for the last four years, both on *private and public* buildings. *The International Hotel at Niagara Falls, having 350 feet frontage, and the entensive Engine House and Machine Shops of the New York Central Rail Road, at Buffalo,* are covered with this roofing. I have had no difficulty with it, and have heard no complaints, and I do not hesitate to say, that in my opinion, formed from *actual experience with its extensive use,* that it is the *best material* for flat roofs now in use, for its *cheapness, durability and susceptibility of being readily made perfectly tight, and its great power to resist fire.*

Baltimore, Feb. 14, 1854. WM. BROWN, Architect.

Gentlemen—At a low place upon the roof, the water stood about four inches deep after a rain—not one drop of which ever passed through, but remained until evaporated by the sun. When the Company's buildings were destroyed, that roof stood until the timbers were burnt from under it, and when no longer able to support the weight of the pebbles upon it, *the whole fell into the lower story. The blaze never passed through that roof.* If I had buildings to cover, I should use your Composition Roof, in preference to any other. Yours truly,

Richmond, Oct. 8, 1853. JOHN WATERHOUSE.

IMPROVED FIRE AND WATER PROOF

FELT AND COMPOSITION ROOFS.

FROM MATERIALS MANUFACTURED BY THE

NEW ENGLAND ROOFING COMPANY, BOSTON.

The Subscriber feels warranted in saying, that no Roofing material ever introduced into the State of Maine, has met with such success as the above.

This Roofing has been tried under every variety of circumstances, and exposed to every change of climate, and has not been affected in the least thereby.

IT WILL NOT EXPAND NOR CONTRACT WITH HEAT AND COLD, LIKE METAL ROOFING.

IT IS NOT AFFECTED BY THE JAR OF MACHINERY,

AND

CAN BE WALKED UPON WITHOUT INJURY.

It will stand six times the heat of Tin, and more than double that of Iron, without burning the boarding of the Roof beneath it,—and can be put on with great expedition, and at about ONE-HALF THE COST of other Fire-Proof Coverings.

All orders promptly attended to. Circulars may be obtained, and further information given on application, either personally or by letter to

—New Gallery for Patent Ambrotypes and Photographs of every size and description, with all the improvements.

Ambrotypes in Lockets and Pins, Cases, and Frames of all descriptions. Rights for sale, and instruction given in Cutting's Patent Ambrotype and Mezzograph process.

The subscriber, having purchased one half of the proprietor's entire Right for Cutting's Patent Ambrotypes, in the city of Boston, has opened a

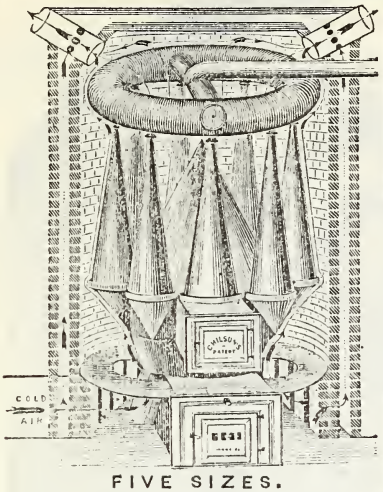
GALLERY OF AMBROTYPES,

123 WASHINGTON STREET, BOSTON,

For the purpose of taking these beautiful and enduring pictures in Glass. The Ambrotype, being hermetrically sealed between two plates of fine polished glass, (by a cement which not only secures, but gilds and beautifies the impression,) is proof against the action of water or acids, or the variations of climate in long sea voyages, and is the only kind of picture that will remain unchanged by time. They can be taken from the size of full life to the smallest miniature, and in one-quarter the time of the Daguerreotype. They are not reversed, can be seen in any light as plainly as an engraving; hence are very suitable for Pins, Lockets, and large Frames, as well as Cases. The extreme popularity of the Ambrotype, has given rise to much imposition. Counterfeits upon single glass, covered with black varnish, are often sold for Ambrotypes. None are genuine without the patent stamp. The public are invited to call and examine specimens at the WASHINGTON STREET AMBROTYPE GALLERY, No. 123. **J. BRIGGS.**

CHILSON'S NEW CONE FURNACE.

(PRESENTING A CLUSTER OF CONES OVER THE FIRE,)



FIVE SIZES.

JUST COMPLETED AND PATENTED,

IN AMERICA, ENGLAND AND FRANCE.

UNPARALLELED ECONOMY IN FUEL!

Retaining and holding the Smoke and Gases in a cluster of CONES, exposed to the reflected rays of heat acting on the tapering surface of the Cones,—not unlike the action of the sun on the sun-glass,—the rays of the heat and light being brought to a focus in each Cone, as represented by the cut.

The Inventor of this Furnace feels truly grateful to his friends and a generous public, for the extensive introduction, and very favorable reception that his formerly patented Furnace has received in all parts of the land; and now respectfully asks those in want of heating apparatus, to examine this new invention, carefully, and see if they do not find it a perfect remedy for the present enormous waste of heat carried off in the the chimney.

This newly discovered principle is being applied to Stoves, Steam Boilers, &c., with remarkable success.

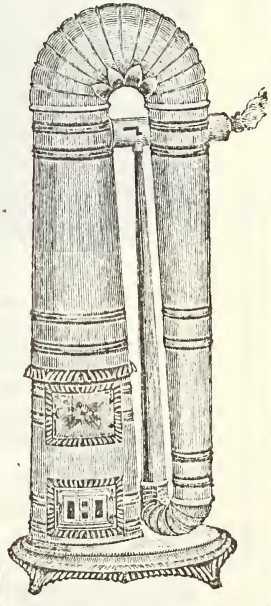
Patented in UNITED STATES, Sept. 26, 1854. ENGLAND, May 26, 1854. FRANCE, June 14, 1854.



CHILSON'S PATENT

TRIO STOVE.

SIX SIZES.

Any intelligent mind cannot fail to see the wonderful economy in the consumption of fuel by this Invention, over the common Portable Furnaces. Immediately after the fire is kindled in the morning, the damper in the smoke pipe is closed for the day; when the only escape for the heated smoke and gases is through the continuous tapering trunk or radiator, terminating in the smoke pipe, which is reduced to a small vent of two inches in diameter.

The heated smoke and gases are thus compressed into the whole circuit of the trunk, and become wholly exhausted by radiation. The consequence is, that the formerly wasted fuel, which was lost by passing off in smoke and gases in a crude or unconsumed state, is here made available for generating heat.

Warrante l a Saving in Fuel of Fifty Per Cent. over any other Portable Furnace in the known world.

THE

TRIO STOVE

embodies the same valuable principles combined in the Portable Furnace. We think no prudent person will use stoves, as they have been formerly constructed, after becoming acquainted with this invention.

We obligate ourselves to prove, to the satisfaction of all, a saving of Fifty per cent. in Fuel, not only by seeing the stove in operation, but by a large number of the best testimonials that can be written.

As usual we offer a full assortment of

FURNACES, RANGES, STOVES, MANTELS, GRATES, VENTILATORS, &c., &c.

ECONOMY IN LIGHT.

I would invite all interested in a CHEAP, CLEANLY, ECONOMICAL, and BEAUTIFUL LIGHT, to examine my

NEW SOLAR LAMP,

FOR BURNING FLUID.

It is perfectly safe, and as easily managed as a common Oil Solar, giving a bright, steady flame, equal to the best Gas Burner.

The construction is such, that by a touch of the hand, (like the wonderful lamp of Aladdin,) the flame, from a full blaze, can be reduced so small that it may be burned all night at a cost not exceeding one cent. This lamp is adapted for

LIGHTING HALLS, CHURCHES, STORES, PARLORS, &C., &C.

SAMUEL B. BROWN, Proprietor.

This large and elegant Hotel was opened by the proprietor, (formerly of the HATCH HOUSE), on January 1, 1856. It is built of brick, four stories high, by 80 feet long, fronting a public Square in the most central portion of the city, and contains eighty well finished and thoroughly furnished rooms, with every arrangement for comfort and convenience. A spacious Stable is also connected with the House.

The proprietor returns his sincere thanks to the public for their liberal patronage in past years, and trusts by strict attention to their interests, to merit, under the superior facilities of the DWINEL HOUSE, a continuance of the same.

WHEELER & WILSON'S

IMPROVED

FAMILY SEWING MACHINES.

These improved Machines are rapidly coming into general favor, and acknowledged to be the ONLY machines adapted to family use. The beauty and durability of their stitching are unrivalled, working equally well on fine cambric, quilting and heavy broadcloth. The rapid and noiseless operation of these machines is an advantage possessed by no other, while their simplicity of construction renders them easier of use, besides being less liable to get out of repair—an objection reasonably urged against all other machines. To Families, Shirtmakers, Tailors, Milliners, &c., one of these machines is invaluable.

Late improvements in these machines, have added much to their usefulness, rendering them peculiarly suitable for family use.
